

THEY WILL KILL ME, JOSH

Emergency Email — 7 May 2026

AblePoint Entrapment — Active Death Threat — Documented

Dr. Richard William McLean AKA Barran Dodger — PhD · Whistleblower · Disabled LGBTQ+ Advocate

ABN 78 833 496 164 · barrandodger.com · 9 May 2026

CONTEXT AND SIGNIFICANCE

On 7 May 2026, Dr. Richard William McLean sent an emergency email with the subject line "They Will Kill Me, Josh" to his AblePoint support worker. This document is a primary-source emergency communication sent from a person under active death threat to their NDIS support provider. It is blockchain-sealed and forms part of the evidentiary record for Wyong Local Court on 14 May 2026.

DOCUMENTED ENTRAPMENT MECHANISM

- **AblePoint Placed Dr. McLean at the Threat Address**

AblePoint (NDIS registered provider) placed Dr. McLean at 55B Archbold Road, Long Jetty NSW — the address where the documented death threat was received on April 15, 2026. No safety review has been conducted. No relocation has occurred.

- **Banned from Contacting His Own Provider**

Dr. McLean has been directed by AblePoint not to contact them — the entity that controls his NDIS funding, manages his support arrangements, and placed him at the address of the death threat. A participant banned from contacting their provider is structurally entrapped within the NDIS system.

- **No Transport, No Finances, No Legal Representation**

Dr. McLean has no independent transport, no independent financial access, and no functioning legal representation. The NDIS — designed to support his disability — has become the structural mechanism of his entrapment.

- **NDIS Act 2013 s.73Z — Mandatory Reportable Event Not Reported**

The April 15, 2026 death threat is a mandatory reportable incident under the NDIS Act 2013 s.73Z. AblePoint has not reported it. Each day of non-reporting is a documented statutory breach.

- **ABO Application Filed — Police Did Not Act**

Dr. McLean filed AVO applications against all named parties threatening his life on April 15, 2026. Police attended. No event number was recorded. No arrest was made. One officer was subsequently relieved of duty.

- **The Emergency Email as Evidence of Entrapment**

The "They Will Kill Me, Josh" email is evidence of the complete failure of the NDIS support system to provide the basic protective function it is legally required to provide. An NDIS participant sending an emergency email to their support worker because they have no other avenue of protection is the documented definition of entrapment within a failed system.
